25X1X6

1. The emergency air field at Aidussina is being used as a proving ground and training area for the Yugoslav Army. The field has not been used by any planes for several months, and, at present, there are no air field installations or facilities.
2. There is a w/t station in Aidussina which operates on 1.5 kw and is in contact with Ljubljana. This station is located in the house of a certain Rizzato in the center of the town. Latest reports indicate that this station will be replaced by a more powerful 15 kw station. There also exists a powerful military radio station in Aidussina which is in contact with Belgrade and which broadcasts "Tanjug" news items.
